Android Market

Before there was Google Play, there was Android Market. Launched in 2008, Android Market was redesigned with Donut to expose top free apps and paid apps just as Android's third-party app catalog started to explode.

Google Maps Navigation

Google Maps Navigation gave new meaning to the definition of a smartphone. Turn-by-turn directions using Google Maps data included many features found in a typical in-car navigation system: a forward-looking 3D view, voice guidance, and traffic information - all for free.

Home screen customization

Android has always let you make your home screen just how you want it with custom ringtones, wallpapers, and the ability to arrange apps and widgets across multiple screens and in folders. Eclair introduced live wallpapers that came to life on an unheard-of 854 x 480 display.

Portable Hotspot

With tethering, Froyo let you turn your phone into a portable Wi-Fi hotspot so you could stay connected even when on the go.

Android 2.2 Froyo

Performance

Froyo introduced the Dalvik JIT compiler which delivered up to 5X performance improvement in CPU-bound code. It also brought the V8 JavaScript engine to the Android browser resulting in 2-3X improvement in JavaScript performance.

NFC

Several years before in store mobile payments took off, Android launched Near Field Communication (“NFC”) support which let you transmit information between devices just by bringing them close together. With NFC, Gingerbread launched a slew of possibilities for delivering services with the simple tap of a device.

Android 9.0 Pie

Adaptive Battery

Go more with a single charge. Adaptive Battery learns how you like to use your phone, so the apps and services you don't use as much aren't a battery drain.

Adaptive Brightness

Don't worry about changing your brightness — your phone learns how you like to set it and automatically adjusts. Easy as pie.

Android 9.0 Pie

App Actions

Right there, right when you want it

App Actions predicts what you're about to do, so you get to your next task more quickly. If you do something like connect your headphones, the playlist you were listening to earlier is front and center.

Slices

The best of your apps, even faster

Slices bring relevant parts of your favorite apps to the surface. Next time you search for Lyft, you can see prices and driver ETAs right within your results.

Android 10

Live Caption

Automatically caption media playing on your phone.

With a single tap, Live Caption automatically captions videos, podcasts, and audio messages—even stuff you record yourself. Without ever needing wifi or cell phone data.

Android 10

Dark theme

Take it easy on your eyes. And your battery.

Android's new Dark theme uses true black to keep your battery alive longer. Plus, it also changes how your Google apps look, like Calendar and Photos.¹
